

AEA – Press Release

CUSTOMERS VOTE AEA TECHNOLOGY BEST CONSULTANCY FOR CLIMATE CHANGE AND RENEWABLES IN EDIE AWARDS 2007

24 OCTOBER 2007

Environmental consultancy customers across the UK have voted AEA the Best Consultancy for Climate Change and Renewables at the 2007 EDIE Awards held last night, Tuesday 23rd October.

Robert Bell, Managing Director of AEA, said:

‘Climate change is one of the biggest challenges facing businesses. As a leading advisor to the British Government and the EU, AEA has developed many innovative ways to help mitigate the threat of climate change and enable businesses to compete more effectively. We are naturally delighted that customers across the country have recognised our expertise.

‘Alongside AEA’s other areas of specialism such as air quality, transport and resource efficiency, we intend to continue to build our leadership position in climate change and renewable energy, both in the UK and internationally.’

AEA Technology is a focused energy and environmental consultancy listed on the London Stock Exchange. It provides world-renowned independent consultancy advice to public and private sector organisations from policy creation through to programme implementation. AEA applies its energy and environmental skills in specialist areas such as carbon management & climate change, resource efficiency, air quality and transport.

Recently, AEA completed a six-year environmental audit assessment on one of the world’s largest integrated oil & gas projects, Sakahlin II in Russia, it is the manager for the UK government’s Envirowise project, one of the world’s largest resource efficiency programmes and provides carbon management expertise to many of the UK’s largest private sector organisations. It is also supporting BT in the roll out of its £250 million programme to develop wind power sites that aims to generate 25% of the Company’s electricity generation needs by 2016.
